EDUCATION

Master of Mechanical Engineering
Cracow University of Technology | 2017 – 2023
Specialization: Computer Aided Engineering Design

SKILLS

Testing: Manual Testing, End-to-End Testing, Regression Testing, Integration Testing, Test Case Design, Defect Reporting

API: Postman, SoapUI, Swagger, GraphQL, REST API, SOAP

Automation: Robot Framework, Selenium, Python (basic), Groovy (basic)

Databases: SQL (SELECT, JOIN, data validation)

Tools: Jira, Xray, Confluence, Jenkins, GitLab, Kibana, Grafana, Kubernetes, Linux, DevTools

Methodologies: Agile, Scrum

Language: Polish – Native

English – Upper-Intermediate (B2)

Interests: Football, Automotive, Video Games

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

SUMMARY

Software Test Engineer with 3,5+ years of experience in manual, API, and automated testing of web-based systems. Skilled in designing and executing test scenarios, performing end-to-end testing, validating integrations, and analyzing system behavior using SQL, Postman, and SoapUI. Experienced in Agile environments, with strong analytical skills, attention to detail, and a focus on delivering high-quality software.

WORK EXPERIENCE

Software Test Engineer

T-Mobile (Sep 2024 – now)

- Perform manual end-to-end testing of API integrations between internal systems
- Create test scenarios based on requirements and implementation documentation
- Validate SOAP and REST services using SoapUI
- Use SQL queries to verify data correctness and validate system behavior
- Analyze logs and investigate issues using Linux commands and Kubernetes tools
- Identify and report defects, supporting issue resolution in Agile teams
- Collaborate with developers and analysts to improve integration quality

Junior Quality Assurance Engineer

Comarch (Aug 2022 – Aug 2024)

- Designed and executed manual test scenarios for web applications, including regression and integration testing
- Prepared test cases based on business and technical requirements
- Performed API testing using GraphQL and Postman
- Developed automated GUI tests using Robot Framework and Selenium
- Investigated issues using DevTools, Kibana, and Grafana
- Reported and tracked defects in Jira/Xray
- Created testing documentation and user instructions
- Cooperated with developers and analysts to improve software quality

QA and Documentation Intern

ZMR (Apr 2022 – Jul 2022)

- Prepared technical and quality assurance documentation
- Supported validation testing processes
- Performed measurements using diagnostic tools
- Worked according to GMP standards and quality procedures
